

Dental Instruments Catalog 2026

HiTeck
Your Partner in Dentistry

YOUR FAVOURITE INSTRUMENT BRAND

HiTeck is one of Canada's leading providers of dental instruments and sterilization cassettes, trusted by more than 10,000 dental offices across North America. We're dedicated to delivering premium quality instruments and exceptional customer service, making HiTeck the top choice for dental practices seeking reliable, high performance solutions.

To Our Valued Customers

Over the past decade, we've proudly guided HiTeck to new heights by delivering innovative dental instruments to professionals around the world. On behalf of our entire global team, thank you for trusting us with your instrument needs. We remain committed to constant growth and innovation, making dentistry simpler by serving as a true partner to our customers.

I'm thrilled to introduce our 2025 Product Catalog, showcasing a wide range of new, cutting-edge solutions. We look forward to continuing our shared journey of advancing dentistry and improving patient care. Thank you for your ongoing support, and we can't wait to see what we'll accomplish together.

Sincerely,

HASSAN TUFAIL
CEO

SERVICES OFFERED

OUR SERVICES

Apart from providing quality products, HiTeck focuses on providing the best in industry services to its customers.

INFECTION CONTROL GUIDANCE

Infection control in a clinic is very important. Proper infection control minimizes cross contamination and increases a patient's trust in their doctor. We have a number of products available for proper infection control, and also provide guidance on a regular basis to our clients who might have some questions on how to store, sterilize and maintain products properly.

PRODUCT SOURCING & CONSULTATION

With our product sourcing & consultation service, we make it easier for our customers to choose the right product for the right procedure. With too many options in the market, it can sometimes become confusing to choose the right product. We also help our customers source a product that they need to get for their procedure. Contact us to find out more about our sourcing & consultation service.

NEW PRODUCT DESIGN

Due to new research and advancement in the medical field, it is very important to keep on introducing new and better products into the market. We routinely work with our customers to bring new and improved products to the market. If you have a concept of a revolutionary product or have modification suggestions to an existing product, please contact us.

PROPER REPROCESSING TECHNIQUES

Proper instrument reprocessing can significantly increase the life of the product. We continually work with our customers to educate them on the proper technique to reprocess their instruments on a daily basis, so that they may maintain the integrity of the products. For more information, please visit our reprocessing page, or contact us.

HITECK'S CONCIERGE SERVICE

TRY OUR INSTRUMENTS AT
THE COMFORT OF YOUR OFFICE.

LET US EXPLAIN HOW THE
WHOLE PROCESS WORKS.

FREE SHIPPING

We can ship all over Canada & USA!

EASY RETURNS

Return Label included in the box!

NO COMMITMENT

You can send everything back, anytime!

1

FILL OUT OUR REQUEST FORM

Enter your details, the sample categories you would like to see. You can also mention specific products that you are interested in.

2

GET INSTRUMENTS TO YOUR DOOR!

Sit back and relax, your package is on its way to your doorstep. Now you can browse through our products at the comfort of your office at the time of your choosing.

3

CHOOSE THE AMOUNT OF TIME REQUIRED

Mention the time you will need to keep the samples with you in order to evaluate. We will include a return label with the instruments.

THE HISTORY

1982

Birth

Began as an OEM manufacturer of medical devices for international brands, producing only a handful of SKUs.

Office in Germany

After 11 years of OEM manufacturing, we established a local branch in Tuttlingen, Germany. This strategic location allowed us to expand our reach to clients in Africa and the Middle East, while partial manufacturing processes began in Germany.

1993

2002

Product Range Extended

We broadened our expertise to cover all surgical specialties, growing our catalog to 50,000 different types of surgical instruments.

Started in Canada

Opened our first branch under our own brand in Canada. Instead of selling only OEM products, we began supplying our branded instruments directly to dental professionals across North America.

2009

20

Lauriya Line Instruments

Introduced specialized coating that enhances durability, sharpness, and provides superior resistance to wear and corrosion.

OF HITECK

Sterilization Cassettes

Debuted a wide variety of customizable sterilization cassettes, improving reprocessing efficiency and helping to prevent sharp injuries.

Implant & Specialized Oral Surgery Instruments

Expanded into implant-related solutions, offering implant scalers, chisels, osteotomes, ridge Split instruments, and more for successful implant procedures.

2012

Orthodontic Range Added

Rolled out a comprehensive suite of orthodontic instruments, ensuring practitioners have all the essential tools for orthodontic care.

We're gearing up for major advancements, from introducing new and innovative products to launching operations in the USA—continuing our mission to equip professionals with cutting-edge, high-quality instruments.

MANUFACTURING QUALITY INSTRUMENTS SINCE 1982

By leveraging state-of-the-art technology and meticulous processes, we ensure every instrument meets the highest standards. Our commitment to excellence in manufacturing naturally results in superior quality products.

MANUFACTURING PROCESSES

Each instrument is carefully crafted through approximately 30 precise manufacturing processes, ensuring every detail meets our high standards of quality and performance. From forging, filing, and tempering to shaping, polishing, and final inspection, each step receives our focused attention—delivering unmatched reliability, durability, and precision.

PRECISION CRAFTSMENSHIP

All instrument are meticulously forged, filed, tempered, shaped, and polished by skilled artisans, ensuring an unparalleled level of accuracy, durability, and reliability.

INNOVATIVE DESIGN

Combining ergonomic design with cutting-edge innovation, our instruments are tailored for optimal performance and user comfort. We continually push the boundaries to provide advanced solutions for modern dental practices.

QUALITY TESTING PROTOCOLS

All instruments undergo rigorous testing protocols to ensure they meet the highest industry standards. Our comprehensive quality assurance process guarantees reliability, safety, and superior performance.

EXTENSIVE PRODUCT PORTFOLIO

Our broad range includes over 15,000 meticulously designed instruments, ensuring comprehensive solutions for all dental procedures and needs

DEDICATED WORKFORCE

Our team of highly skilled professionals is committed to excellence, ensuring that each instrument meets our rigorous standards for quality and precision.

Our extensive range of premium dental surgical instruments is meticulously crafted to deliver precise, reliable performance—even under the most demanding conditions. By blending traditional handcrafting expertise with advanced technology, top-tier materials, and stringent quality control, we create instruments that empower clinicians to offer the highest standard of care to their patients.

SURGICAL SIYAH LINE

Designed for performance & Durability, our Siyah line of surgical instruments are engineered with Aluminum Titanium Nitride to optimize clinical outcomes. From reducing light reflection to enhancing visibility at the surgical site, the Siyah line was created with the clinician in mind.

Reduced Light Reflection

Matte-finish handles and black working ends minimize glare for improved visibility.

Enriched Contrast

Distinct black finish gives better contrast and visual acuity at the surgical site & underlying tissue

Ergonomic Design

The smooth, large-diameter, lightweight handle offers maximum comfort, reduces hand fatigue, and enhances control.

Hardened Steel Construction

Ensures optimal strength and corrosion resistance.

TYPES OF SCISSORS

Stainless steel

A wide array of cutting blades to fit a variety of

Tungsten Carbide (TC)

Featuring Tungsten Carbide inserts bonded to surgical grade stainless steel on both cutting edges for smooth, controlled cutting & maximum durability. Blade lasts 4 times longer

Siyah Super Cut with Tungsten Carbide (TC)

Best of the bunch, featuring a performance engineered coating for optimal edge retention, reduced light reflection afforded by the matte finish, and enriched contrast and visual acuity at the surgical site

Edge Retention

AlTiN coating increases hardness of steel resulting in better edge retention of the blade

Performance-Engineered Coating

Delivers a harder, smoother surface for superior edge retention and enhanced lubricity.

SURGICAL

BEAKS OF EXTRACTION FORCEPS

The beaks of extraction forceps are anatomically designed to adapt to the tooth at or below the cervical line. Therefore, beaks are either conical, bifurcated, or trifurcated in order to adapt to the tooth or furcations.

Many beaks are serrated, which offers additional grasp when extracting teeth.

CONICAL BIFURCATED TRIFURCATED SERRATED

Care of HiTeck Extraction Forceps

Make sure following steps are performed to maintain proper function and appearance:

- Clean and sterilize in an open position.
- Clean and thoroughly dry forceps before wrapping for sterilization.
- Lubricate with Instrument Lubricant after cleaning and before sterilization to ensure smooth working action.
- Use wipes to correct hard-to-operate forceps. Rust spots or sediment can be wiped off, as they do not penetrate the surface.
- Do not allow forceps to remain in water or steam moisture for long periods.
- Keep forceps away from strong mineral acids and fumes.

TYPES OF FORCEPS

DIAMOND DUSTED FORCEPS

Featuring a fine diamond coating for enhanced grip and control, these forceps provide superior tooth engagement. Available in multiple patterns for full-mouth coverage.

KUMANI FORCEPS

Designed with an internal spring hinge for smooth handling, ensuring precision, comfort, and control while minimizing forceps manipulation at the surgical site.

APICAL FORCEPS

Forged with thin, tapered beaks and longitudinal serrations for a secure multi-point grip, reducing crown fractures and preserving bone integrity during extractions.

ATRAUMAIR FORCEPS

Matte-finished for reduced glare, these lightweight forceps feature enhanced beak geometries and an ergonomic hole design for improved access, comfort, and control.

STANDARD FORCEPS

Crafted from high-quality stainless steel, these forceps ensure strong grip, optimal leverage, and versatility for routine extractions in various clinical applications.

The Siyah Deep Grip Forceps are coated with Aluminium Titanium Nitride that is significantly harder, scratch-resistant and non-reflective for long lasting performance.

Increased hardness ensures long-term integrity of both the beak serrations and forceps overall.

- Extremely smooth surface seals the pores of the stainless steel, minimizing protein adhesion and reducing time to clean.
- Matte finish that reduces distracting glare and reflections mid-procedure.
- Machined beaks give you precision and control over your extractions.

Reliable, high-quality diagnostic instruments are essential for accuracy and efficiency in every procedural setup. Our selection includes color-coated steel probes, Lachak Explorers, and HD & Black Line Mirrors, all designed for enhanced visibility, precision, and durability. These instruments provide clinicians with the tools they need for optimal diagnosis, treatment planning, and patient care, ensuring long-lasting performance in daily practice.

EXPROS

An Expro is excellent for dental examinations and charting, since it combines two critical instruments required for every effective diagnostic setup – an explorer on one end and a probe on the other.

EXPLORERS

Explorers are crafted from Lachak Steel, a specially blended steel alloy which provides flexibility and resilience for precise diagnostic procedures.

DIAGNOSTIC

PROBES

Colour Probes are coded with accurate, smooth black markings, which will not chip, flake, or fade. Colour Probes feature a vivid markings for enhanced contrast intraorally.

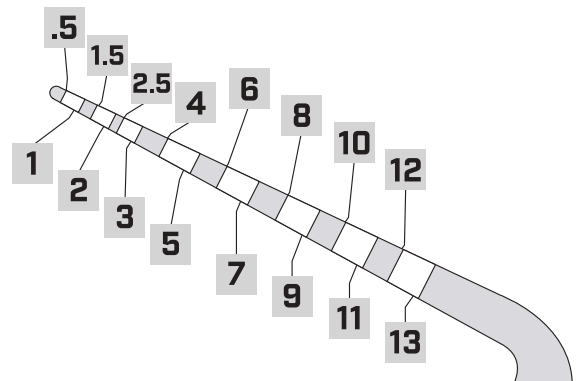

HD MIRRORS

Designed for enhanced performance, our HD Siyah Line Mirrors are engineered to optimize clinical outcomes by delivering superior visibility throughout any dental procedure. The Diamond Like Carbon (DLC) coating of the handle and the mirror frame reduces glare up to 80%! The durable black matte finish in combination with the superior brilliance and color of our proprietary HD Mirror glass facilitates quicker and more accurate visibility of the mouth.

TWEEZERS

Used to grasp or transfer materials in and out of the oral cavity, all dressing pliers are made of heavy gauge, heat-treated stainless steel to ensure long life and precise beak alignment.

Our hand scalers are precision-crafted from high-grade stainless steel for exceptional durability and performance. Designed for sharpness and long-lasting edge retention, they provide reliable efficiency in every procedure. With meticulous craftsmanship, these instruments ensure precise handling, enhancing patient care with ease.

GRACEY COMPARISON CHART

GRACEY CURETTE BLADE ANGULATION

ARHUM Gracey Curettes

Designed to adapt to a specific area or tooth surface.

- Longer terminal shank allows better access to deep pockets and areas with recession.
- Blade is 10% thinner than standard Gracey curette to allow for less tissue distention when accessing deeper pockets.

ARHUM GRACEY

Terminal shank redesigned to be 3 mm longer than a standard Gracey curette.

The Curved Sickle Scaler

Two cutting edges on a curved blade that end in a sharp point

The Straight Sickle Scaler

Two cutting edges on a straight blade that end in a sharp point (also known as a Jacquette Scaler)

DESIGN COMPARISONS

Gracey Type	Shank Design & Diameter	Blade Length	Blade Width	Available Patterns & Area of Use
Standard	Standard	Standard	Standard	1/2, 3/4, 5/6 7/8, 9/10 11/12, 15/16 13/14, 17/18*

Our comprehensive range of endodontic hand instruments and accessories is designed to complement your expertise. Whether performing routine root canals or complex microsurgery, these instruments offer precision, durability, and reliability for seamless procedures. Crafted for optimal performance, they help ensure exceptional patient care.

RUBBER DAM CLAMPS

Our Rubber Dam Clamps are crafted from a high-performance steel alloy, ensuring corrosion resistance, exceptional strength, and an ideal balance of flexibility and memory. The matte finish minimizes glare by absorbing light, providing a clear and comfortable field of vision for enhanced precision during procedures.

ENDODONTIC

ENDO EXPLORERS

Our Endodontic Explorers are crafted from a specialized alloy blend, offering optimal flexibility, strength, and tactile sensitivity for precise assessment of the treatment site. Designed for durability and resilience, they come in various double-ended configurations and handle styles to suit different clinical needs.

ENDO EXCAVATORS

Our Endodontic Excavators are designed with extended-length shanks and crafted from high-grade stainless steel for superior durability and precision. Handcrafted for optimal access to the pulp chamber, they enable efficient and effortless dentin removal, enhancing clinical performance.

ENDO SPREADERS

We offer a diverse range of handcrafted spreaders, meticulously crafted from premium stainless steel to precise specifications. Designed for optimal access to even the most challenging canals, they ensure effective compaction of filling material during lateral condensation for reliable endodontic outcomes.

ENDO PLUGGERS

Our pluggers feature diverse working ends, providing enhanced maneuverability and versatility to meet various clinical needs with precision and ease.

Our restorative instruments are designed to provide precision, durability, and superior handling for a wide range of restorative procedures. Crafted from high quality stainless steel and featuring advanced coatings, these instruments ensure excellent performance and longevity. Our selection includes plastic filling instruments for smooth material application, Siyah black-coated instruments with ALTiN coating for a non-stick, corrosion-resistant surface, and carvers for precise shaping and contouring. Each instrument is meticulously crafted to enhance efficiency, control, and clinical outcomes, ensuring seamless restorative workflows for dental professionals.

SIYAH COMPOSITE INSTRUMENTS

Our Composite Instruments are meticulously designed with an Aluminum Titanium Nitride (ALTiN) coating, ensuring a non-stick, scratch-resistant surface for seamless composite placement. Featuring large yet lightweight handles, they provide exceptional comfort, control, and easy cleanup, making them an essential tool for precise restorative work.

CHISELS & HOES

Chisels are essential for cavity preparation, designed to remove, smooth, and contour tooth structure with precision. They help refine cavity walls for better restorative adaptation. Hoes serve a similar role but offer added versatility, allowing for the removal of calculus and surface stains in addition to shaping and refining cavity preparations.

HATCHETS

Hatchets are precision-engineered restorative cutting instruments designed for refining retentive areas, internal line angles, and cavity preparations. They effectively remove hard caries and unsupported enamel, ensuring smooth, well-defined surfaces for optimal restorative outcomes.

MARGIN TRIMMERS

Margin Trimmers are precision restorative cutting instruments designed to shape enamel margins and create proper bevels for optimal restoration fit. Similar to hatchets but with a curved blade and angled cutting edge, they allow for efficient contouring and precise enamel removal in cavity preparations.

RESTORATIVE

EXCAVATORS

Dental Excavators are essential instruments designed for the removal of softened dentin, debris, and caries during cavity preparation. Featuring sharp, spoon-shaped working ends, they allow for precise excavation while preserving healthy tooth structure. Available in various sizes and angulations, they provide optimal access to deep cavities, ensuring efficient and controlled material removal for better restorative outcomes.

PLACEMENT INSTRUMENTS

Placement Instruments are designed for the precise application of bases and liners within cavity preparations. Their ergonomic design and controlled tip allow for accurate material placement, ensuring a smooth and even foundation for restorations.

PLUGGERS

Pluggers are essential restorative instruments used for packing, condensing, and consolidating filling materials into cavity preparations. Their precise design ensures uniform density and adaptation, enhancing the strength and longevity of restorations.

GINGIVAL RETRACTORS

Gingival Retractors protect tissue during cavity preparation. The concave shape of the tips conform to root surfaces and gingival tissue.

CARVERS

Carvers are designed for shaping anatomical details, contouring surfaces, and trimming excess material in restorative procedures. Their sharp, precise edges ensure smooth, well-defined restorations for optimal function and aesthetics.

CORD PACKERS

Gingival Cord Packers are used to pack retraction cord into the sulcus. The cord packers with round, non-serrated working ends are used for atraumatic cord placement; serrated cord packers should only be used with braided cord.

For wax
300-129 | \$44.99

PKT 1 1928 \$44.99
Curved tapered tips used to flow on molten wax.

PKT 2 1929 \$44.99
Curved tapered tips used to flow on molten wax.

PKT 3 1930 \$44.99
Pointed burnisher used to perfect and enhance the supplemental and developmental grooves.

PKT 3R 1931 \$44.99
Similar to PKT 3, but with a rounded tip vs. a pointed one.

PKT 4 1932 \$44.99
Modified carver used to perfect the external contours and remove excess wax at the cavosurface margins.

PKT 5 1933 \$44.99
Special carver used to remove excess wax as cusp ridges are developed; its contour maintains desired convexity at these ridges.

1 Goldstein 2467 \$57.99

Small universal style with rounded plunger tip and a narrow paddle for initial placement and contouring of Class I, II, and III restorations

2 Goldstein 2468 \$57.99

Larger universal style for final placement and contouring of Class I, II, and III restorations.

3 Goldstein Extra Flex 2469 \$57.99

Flexible, reversed, flared paddle design for shaping and placement of Class III and IV restorations

4 Goldstein Extra Flex 2470 \$57.99

Flexible, paired, offset, paddle-shaped blades for placing and shaping material on posterior, mesial and distal surfaces. Reverse angle is also useful for placing and shaping anterior bonded restorations

5 Goldstein Flexi Thin 300-101 \$57.99

Small reverse angle tips make it easy to place fissures, grooves and pits creating the ideal occlusal anatomy in hard to reach posterior areas.

6 Goldstein Flexi Thin 300-102 \$42.99

Large reverse angle tips make it easy to place fissures, grooves and pits creating the ideal occlusal anatomy in hard to reach posterior areas

1 Mini Goldstein 2473 \$57.99

Mini version of 1 Goldstein for small pits and fissures, tunnel preparations or minor tooth defects on lower anteriors.

2 Mini Goldstein 2474 \$57.99

Mini version of 2 Goldstein. Can also be used for packing gingival retraction cord

3 Mini Goldstein Extra Flex 2475 \$57.99

Mini version of 2 Goldstein. Can also be used for packing gingival retraction cord

4 Mini Goldstein Extra Flex 2476 \$57.99

Mini version of 4 Goldstein for placing and shaping material in difficult to access mesial and distal posterior restorations

AB1 Bhogosian 2363 \$57.99

Unique combination of thin, knife-shaped blade with standard angled blade. Knife blade allows controlled, efficient manipulation of composite even in gingival areas. Application: Class III, IV, V

AB2 Bhogosian 2364 \$57.99

Used for measuring composite layers and shaping occlusal anatomy

W3 2365 \$57.99

Combination of medium-sized blade with small condenser tip for universal adaptability. Ideal for placement, layering and general contouring. Application: Class I, II, III, IV, V

8A 2366 \$57.99

S

4/5 Gregg 2367 \$57.99

Interproximal Carver 2368 \$57.99

Interproximal Carver, Long 2369 \$57.99

Used for placement of the composite increments against the cavity wall or adjacent tooth surface

A6 2370 \$57.99

Contouring Instrument 2371 \$57.99

1 Loesche 1936 \$57.99

2 Loesche 1937 \$57.99

11 Anterior 1938 \$57.99

179 Anterior 1939 \$57.99

1 Woodson 1940 \$57.99

21B Acorn 300-103 \$57.99

27/29 300-104 \$57.99

G Marginal Ridge & Embrasure Shaping Instrument 300-117 \$57.99

Allows formation of marginal ridges along with buccal and lingual embrasures while composite is uncured.

H Occlusal Anatomy Instrument 300-118 \$57.99

Designed to help attain proper occlusal form, function and improve marginal seal.

I Composite Packing Instrument 300-119 \$57.99

Aids in forming a properly filled axial box and occlusal portion.

2 Ladmore 300-105 \$57.99

Medium to large rounded tips for condensing composite materials

3 Ladmore 300-106 \$57.99

Small to medium slightly rounded tips for condensing composite materials

Ball 18 300-107 \$57.99

Used to smooth and shape composite

Freedman Duckhead 300-108 \$57.99

Used to contour the convexity of the cusp ridge, developing the anatomy in a single motion

Freedman Small Contact Forming 300-109 \$57.99

Acorn-shaped instrument for forming occlusal anatomy in posterior restorations

Freedman Large Contact Forming 300-110 \$57.99

Small/Medium Ball 300-132 \$57.99

Small/Medium Contact Forming 300-133 \$57.99

Medium Large Contact Forming 300-134 \$57.99

Rounded cone-shaped instrument to provide improved contact forming for medium/ large Class II restorations

A Cosmetic Contouring 300-111 \$57.99

Identical, opposing, large, flexible, oval shaped blades, straight and angled, for contouring composite material on larger facial surfaces of central incisors.

B Cosmetic Contouring 300-112 \$57.99

Identical, opposing, spear-shaped blades, straight and angled, used for contouring composite material on smaller facial surfaces of central incisors.

C Cosmetic Contouring 300-113 \$57.99

Flexible, oval-shaped blades – one slightly larger – for interproximal contouring on central incisors.

D Cosmetic Contouring 300-114 \$57.99

Used when working near or at interproximal areas. Straight end compacts composite material, while sharp knife edge cuts composite to avoid bonding to adjacent tooth.

E Cosmetic Contouring 300-115 \$57.99

Small and medium curved blades for thinning and shaping composite material at the gingival areas.

F Cosmetic Contouring 300-116 \$57.99

Uniquely-shaped blades with curved and rounded tips for adding and shaping composite material on desired areas of facial incisors.

Straight Interproximal **300-123** \$109.99

For anterior crown removal.

45° Angle **300-124** \$109.99

For cuspids, bicusps and even first molars.

Occlusal **300-125** \$109.99

Right Angle **300-126** \$109.99

For molars.

For

Interproximal	1903	\$44.99
Extremely thin, flexible blade; ideal for interproximal contouring.		
1/2 Hollenback	1904	\$44.99
Universal adaptability. Ideal for placing, carving and contouring amalgam.		
3S Hollenback Carver	1905	\$44.99
Design characteristics similar to 1/2 Hollenback but with slightly larger blades.		
3 Hollenback Carver	1906	\$44.99
Design characteristics similar to 1/2 Hollenback but with significantly larger blades. Hollenback but with significantly larger blades.		
8 Wiland	1907	\$44.99
Extremely thin curved blade; ideal for adapting to interproximal surfaces.		
1/2 Discoid Cleoid	1908	\$44.99
4/5 Discoid Cleoid	1909	\$44.99
3/6 Discoid Cleoid	1910	\$44.99
89/92 Discoid Cleoid	1912	\$44.99
Interproximal Off Angle	2378	\$44.99
Extremely thin, flexible blade. Off-angle provides better access to posterior areas.		
6 Tanner	2382	\$44.99
1 Hollenback	2395	\$44.99
2 Hollenback	2396	\$44.99
L7 Levy Carver	2397	\$44.99
21 Aesthetic Carving Knife	2454	\$47.99

Orthodontics is a demanding specialty, requiring precision, efficiency, and patient-centered care. We provide innovative solutions to help streamline your workflow, including our Clear Aligner Instruments, designed for enhanced accuracy and control when working with clear aligners. Crafted with ergonomic designs for superior handling, our instruments ensure a comfortable experience for both clinicians and patients. By optimizing performance and reducing strain, they help create a smooth, stress-free treatment environment, allowing you to focus on delivering exceptional results with confidence.

CLEAR ALIGNER PLIERS

Our Clear Aligner Instruments are expertly designed to enhance, customize, and optimize the biomechanics of clear aligners—no heat required. These innovative tools allow for precise adjustments, ensuring a tailored fit and improved treatment efficiency for a seamless aligner experience.

CUTTERS

Our precision-engineered cutters feature razor-sharp, accurately aligned cutting edges for consistent performance in every procedure. Designed for specific areas of focus, each cutter is crafted to deliver optimal results for its intended wire size. To ensure superior cutting efficiency, all blades are hand-finished to meet the highest standards of precision and durability.

ORTHODONTIC

UTILITY PLIERS

Strong yet lightweight, our Utility Pliers are meticulously crafted for perfect balance and precision. Designed with ideal proportions for a natural grip, they provide superior control and effortless versatility. Engineered for both clinician comfort and patient ease, these pliers ensure a seamless experience in every procedure.

WIRE FORMING PLIERS

Our precision-crafted instruments function as a seamless extension of your expertise, allowing for precise wire bending without risk of damage. Featuring impeccably smooth, hand-finished tips, they provide exceptional control and accuracy when shaping stainless steel or nickel titanium. Designed to enhance your skill and craftsmanship, these instruments help bring your work to life with precision and confidence.

MATHIEUS

Crafted with the same precision and attention to detail as our pliers, our Mathieu needle holders are forged from high-quality German steel, ensuring exceptional durability and resistance to rust and corrosion. Designed for precision and longevity, they provide reliable performance in every procedure.

HAND INSTRUMENTS

Our Orthodontic hand instruments feature a meticulously designed ergonomic handle, offering optimal comfort, balance, and control. Crafted with precision and excellence, each instrument is engineered for superior performance, ensuring accurate tip alignment and reliable functionality in every procedure.

The Tear Drop
400-101 | \$179.99

An instrument created to add a notch at the gingival margin of clear aligners anywhere elastic hooks are required within the arch. The Tear Drop provides a reservoir to hold the elastics in place as the aligner is seated. This permits easier manipulation of elastics by the patient.

The Horizontal
400-103 | \$179.99

The Horizontal instrument produces an indentation to accent individual root torque. It also serves a second purpose by enhancing retention of either clear aligners or retainers by placing an indent into a tooth's undercut or below a bonded attachment to enhance the contact of the aligner to that attachment.

The Hole Punch
400-104 | \$179.99

The Hole Punch is used to create 6mm half-moon cutouts for relief of clear aligners around bonded buttons used for elastics. No need to attempt to attach buttons to plastic trays. In addition, the Hole Punch can nip away plastic to provide soft tissue clearance to prevent aligner impingement of tissue.

The Spot
678-804 | \$179.99

The Spot creates a tiny, rounded dimple for spot contacts to accent small individual tooth movements or added aligner retention. It is typically used to accent movements on any tooth that just needs a slight "nudge". The Spot's small depression placed adjacent to the gingival embrasures can also enhance the retentiveness of an aligner or retainer.

The Vertical
400-102 | \$179.99

Correcting rotations is often a challenge with aligners. The Vertical emphasizes over-correction of rotations by producing an indentation at the mesial or distal line angles on the facial and/or lingual of a specific tooth. As an option, a rotational couple can also be created using vertical indents on facial and lingual surfaces on opposing sides of a tooth. The Vertical can also be used to produce an indent to produce a mild "nudge" to enhance resolution of in-and-out discrepancies. It can also be used to apply an indent immediately next to an attachment to enhance the adaptation of the aligner to angle between that attachment and the aligner.

**The Counter
Clockwise Wedge**
678-807 | \$179.99

The Counter Clockwise Wedge is used to produce a wedge-shaped indent in an aligner at the facial and at the opposite line angle lingual for a specific tooth to create a rotational couple. Used to create a counter clockwise rotation.

The Eraser
678-811 | \$179.99

The Eraser is designed to reverse or remove unwanted indents placed by other instruments in the Clear Aligner Series. The Eraser is designed to flatten the plastic where a depression was inadvertently positioned, or the accent is no longer required.

The Petite Punch
678-805 | \$179.99

The Petite Punch cuts a 4.5mm half-moon cutout in an aligner for relief of the plastic around bonded buttons used for elastics. When only a small cut-out is required to provide clearance for buttons or hooks on the buccal but also on the lingual of any tooth in the aligner, especially for smaller teeth. The Petite Punch can also nip away plastic to provide soft tissue clearance to prevent aligner impingement of tissue.

The Clockwise Wedge
678-808 | \$179.99

The Clockwise Wedge is used to produce a wedge-shaped indent in an aligner at the facial and at the opposite line angle lingual for a specific tooth to create a rotational couple. Used to create a clockwise rotation.

SAVE TIME, GROW YOUR PRACTICE WITH OUR INSTRUMENT MANAGEMENT CASSETTES.

INSTRUMENT

HiTeck's Instrument Management Cassettes can help you streamline your office's reprocessing work flow, saving you valuable time with each reprocessing cycle.

Have a look at the comparison chart below to see how much time you can save with each reprocessing cycle. Multiply that by the amount of procedures you do in a day, and you can save a lot of time.

TOTAL TIME SAVED : 11 MINS

MANAGEMENT

Our Cassette-Based Instrument Management System streamlines the workflow from cleaning to chairside, enhancing efficiency and safety by minimizing direct handling of contaminated instruments. By eliminating multiple time-consuming steps, cassettes help save 5 to 10 minutes per procedure, reduce sharps injuries, and preserve instrument integrity. This system not only increases productivity but also supports compliance with infection prevention standards, ensuring a safer and more cost-effective practice.

ANATOMY OF HITECK'S PREMIUM SERIES CASSETTE

Designed for performance & Durability, our Siyah line of surgical instruments are engineered with Aluminum Titanium Nitride to optimize clinical outcomes. From reducing light reflection to enhancing visibility at the surgical site, the Siyah line was created with the clinician in mind.

Exam Cassette for 5 Instruments

HMCT-1605 | \$164.99

Exterior Dimensions 3" x 8" x 1.25"
(200 mm x 80 mm x 32 mm)

Small Cassette for 7 Instruments

HMCT-1607 | \$169.99

Exterior Dimensions 8" x 3.5" x 1.25"
(200 mm x 90 mm x 32 mm)

Small Cassette for 10 Instruments

HMCT-1610 | \$179.99

Exterior Dimensions 5.5" x 8" x 1.25"
(140 mm x 203 mm x 32 mm)

Large Cassette for 20 Instruments

HMCT-1620 | \$239.99

Exterior Dimensions 8" x 11" x 1.25"
(203 mm x 280 mm x 32 mm)

Exam Cassette for 5 Instruments & Accessory Area

HMCT-2205 | \$189.99

Exterior Dimensions 8" x 5" x 1.25"
(202 mm x 130 mm x 32 mm)

Sterilization Cassette for 8 Instruments & Accessory

HMCT-2208 | \$189.99

Exterior Dimensions 8" x 5.5" x 1.2"
(202 mm x 140 mm x 30 mm)

Small Cassette for 10 Instruments & Accessory Area

HMCT-2210 | \$224.99

Exterior Dimensions 8" x 7.5" x 1.25"
(202 mm x 195 mm x 32 mm)

Large Cassette for 16 Instruments & Accessory

HMCT-2216 | \$254.99

Exterior Dimensions 8" x 11" x 1.25"
(202 mm x 280 mm x 32 mm)

Large Cassette for 12 Instruments & Accessory

HMCT-2212 | \$249.99

Exterior Dimensions 8" x 11" x 1.25"
(202 mm x 280 mm x 32 mm)

Sterilization Cassette for 12 Instruments with Accessory Area, Detachable

HMCT-2212MC | \$249.99

Exterior Dimensions 6.5" x 10.5" x 1.25"
(165 mm x 267 mm x 32 mm)

Large Cassette for 20 Instruments & Accessory

HMCT-2220 | \$419.99

Exterior Dimensions 8" x 14.5" x 1.25"
(230 mm x 368 mm x 32 mm)

Oral Surgery Cassette

HMCT-2214 | \$419.99

Exterior Dimensions 8" x 14.5" x 1.25"
(202 mm x 280 mm x 32 mm)

Small Twin Cassette - Holds 10 Instruments

HMSCT-1910 | \$239.99

Exterior Dimensions 7.9" x 3.2" x 1.55"
(200 mm x 82 mm x 40 mm)

Medium Twin Cassette - Holds 14 Instruments

HMSCT-1914 | \$249.99

Exterior Dimensions 7.9" x 4.5" x 1.55"
(114 mm x 203 mm x 40 mm)

Large Twin Cassette - Holds 20 Instruments

HMSCT-1920 | \$259.99

Exterior Dimensions 7.9" x 5.2" x 1.55"
(200 mm x 132 mm x 40 mm)

Small Thin Orthodontic Cassette

HMCT-4ORTH | \$239.99

Exterior Dimensions 7" x 8" x 0.75"
(178 mm x 203 mm x 19 mm)

Large Thin Orthodontic Cassette

HMCT-7ORTH | \$259.99

Exterior Dimensions 8" x 11" x 0.75"
(203 mm x 280 mm x 19 mm)

Mini Exam Cassette for 3 Instruments

HMCT-1403 | \$84.99

Exterior Dimensions 7" x 2.2" x 0.9"
(180 mm x 55 mm x 22 mm)

Exam Cassette for 5 Instruments

HMCT-1405 | \$89.99

Exterior Dimensions 7" x 2.8" x 0.9"
(180 mm x 70 mm x 22 mm)

Small Cassette for 7 Instruments

HMCT-1407 | \$98.99

Exterior Dimensions 7" x 3.5" x 0.9"
(180 mm x 90 mm x 22 mm)

Small Cassette for 10 Instruments

HMCT-1410 | \$109.99

Exterior Dimensions 7" x 5.1" x 0.9"
(180 mm x 130 mm x 22 mm)

Large Cassette for 20 Instruments

HMCT-1420 | \$149.99

Exterior Dimensions 10.2" x 7" x 0.9"
(260 mm x 180 mm x 22 mm)

Cassette for Multiple Handpieces

CS7 | \$134.99

Exterior Dimensions 7" x 3.5" x 1.25"
(180 mm x 90 mm x 32 mm)

Small Ultrasonic Cassette

SUSTC1 | \$149.99

Exterior Dimensions 8" x 1.25" x 1.5"
(203 mm x 38 mm x 32 mm)

Cassette holds 2 Ultrasonic Inserts or 1 Handpiece

Medium Ultrasonic Cassette

MUSTC4 | \$169.99

Exterior Dimensions 8" x 3" x 1.25"
(203 mm x 76 mm x 32 mm)

Cassette holds up to 3 high-speed Handpieces or 5 Ultrasonic Inserts.

Small Parts Cassette - Size B

HMMT-4105 | \$74.99
 Exterior Dimensions 3.1" x 2.4" x 1"
 (80 mm x 60 mm x 20 mm)

Small Parts Cassette - Size A

HMMT-4104 | \$69.99
 Exterior Dimensions 3.1" x 1.6" x 0.8"
 (80 mm x 40 mm x 20 mm)

Small Parts Cassette - Size C

HMMT-4106 | \$74.99
 Exterior Dimensions 4" x 2.4" x 1"
 (100 mm x 60 mm x 25 mm)

Single Handpiece Cassette

HMMT-4112 | \$84.99
 Exterior Dimensions 6" x 1.6" x 1.2"
 (150 mm x 40 mm x 30 mm)

Clip for Cassettes

AWCLIP | \$12.99
 Used to securely hold air water syringe tip and hinged instruments on the lid of the cassette.
