PROFESSIONAL ADVICE

Dental Professionals - Select the right LUNA Whitening Concentration by assessing the patient's oral health and sensitivity. Use a lower concentration (16% CP to 25% CP) for sensitive teeth and higher concentrations (35% HP) for faster results. Tailored treatments ensure safe, effective, and satisfiable whitening! (Devila et al, 2020)*

Harvard MTA Universal OptiCaps®

Endodontic repair cement in capsules based on MTA

- >> Highly biocompatible material
- >> Excellent bond to dentine
- >> Radiopaque
- >> Firm and homogenous consistency directly from the capsule
- >> Promotes tertiary dentine formation
- >> Setting not affected by humidity
- >> Suitable for pulp capping, sealing root perforations, root end fillings (retrograde)
- >> Mixing time: 30 sec
- >> Working time: 2:00 min (from start of mixing at 23 °C (73 °F))
- >> Next clinical step: 5:00 min

Set also in humid conditions

Harvard InterLock® ONE

Universal Adhesive

- >> Universal: suitable for all tooth conditioning techniques: with or without etching gel, wet or dry
- >> Only one thin layer necessary
- >> High and reproducible bond strength to enamel and dentine even under long term stress
- >> Effective marginal seal for low risk of postoperative sensitivity
- >> Excellent performance also with self or dual cure composites
- >> Convenient and precise application with the triangle ergonomic bottle with defined drop size

If light curing of Harvard InterLock® ONE cannot be achieved, please mix with Harvard InterLock® ONE Self Cure Activator.

Harvard InterLock® ONE Self Cure Activator

- >> Activator for safe adhesion in indications, where light curing of Harvard InterLock® ONE cannot be ensured (e.g. in the root canal)
- >> Ideal for cementing of posts with dual and self cure composites

Harvard ZirconCore

**Dual cure core build-up
 and post cementation composite**

- Excellent consistencies for both indications **core build-up** and **post cementation**
 -
 - Very good mechanical properties for permanent restorations
 - Contains a substantial amount of Nano-zirconia
 - Fluoride release
 - Thixotropic properties
 - Very good radiopacity
 - Self-mixing material with the Minimix syringe
- For optimal results, use with **Harvard InterLock® ONE / Harvard InterLock® ONE Self Cure Activator** or with **Harvard Bond SE Dual**

Grinding without grooves.

Excellent mechanical properties in all curing modes.

PENGUIN PRECISION MULTI-USE DIAMONDS: HIGHEST RATED

NATURAL DIAMOND | PREMIUM QUALITY | 5 PER PACK

REG **\$29.99/Pk**

PROMO 8+2

NET **\$23.99/Pk**

The highest-rated multi-use diamond burs, according to an independent non-profits dental education and product testing foundation.

Manufactured with natural diamonds, which produced more cutting surfaces than synthetic, and Swiss multi-coating technique offers the highest level of cutting efficiency with durability and less clogging.

One-piece stainless steel shanks are specially heat-treated to ensure rigidity, Strength, and precision.

- Synchronized Chair and Back Movement for superior Ergonomics
- Choose from 9 Plush Sewn or Seamless Upholstery Colors and 2 Ultraleather Colors
- Self Contained Water Bottle System
- Thin Backrest and Streamlined Seat rest
- Designed and Engineered in Canada
- DCI Compatible Parts

AUTO CLAVE B

\$330/month

The **Clave B** Autoclave features a pre/post vacuum that provides full penetration of steam into wrapped, porous, and hollow loads. The pre-vacuum phase enables the complete removal of air from the chamber while the post-vacuum air removal ensures that the load is completely dry.

The combination of the pre/post vacuum allows closed door drying and sterilization for the most difficult loads.

The Clave B is an intuitive and easy to use Class B Sterilizer. All operations are controlled with only 4 buttons, with 3 buttons that control the program selection and 1 to start the sterilization cycle.

Health Canada and ETL/CSA Approved
Excellent Sterilizer for use in Dental Offices, Veterinarian Offices, Medical Offices, Podiatry, Chiropractist, Tattoo and Beauty Salons

SINUS AUGMENTATIONS

NovaBone Dental Putty can be used for lateral sinus augmentations and is particularly suitable for the crestal approach given the unique cartridge-based delivery. The Schneiderian membrane is typically elevated without incident.

PERI-IMPLANT DEFECTS

The Putty is suitable for small to moderate-sized dehiscence and fenestration defects around dental implants, whether at the time of placement or for post placement repair. The unique cartridge-based delivery allows for precise delivery of the graft in hard-to-access defect sites or when expressing the graft between the implant body and the remaining wall of the defect.

PARTIAL AND FULL EXTRACTION SITES

NovaBone Dental Putty is an exceptional choice for filling extraction sockets. Given the complete resorption of the material and substitution with host bone, it is ideal for ridge preservation in delayed implant placement protocols.

SUPERIOR DELIVERY

NovaBone Dental Putty is available in a unidose cartridge format that is familiar to practitioners but unique to the bone graft industry. The 2.8mm curved cannula allows for precise delivery of the graft material in difficult to access defects.

It is also a highly effective delivery system for specialized indications such as the crestal approach to sinus augmentation.

FULLY SYNTHETIC

As a synthetic graft material, you can be assured of consistent product quality and the elimination of any risk for disease transmission-factors which may improve patient acceptance.

RADIOPAQUE

The Putty material is radio-dense and hence can be differentiated from the surrounding bone on a radiograph.

CONFIGURATIONS AND ORDERING INFORMATION

NovaBone Dental Putty is available in a variety of configurations including the unique unidose cartridge and syringe options.

CARTRIDGE SYSTEM	CONFIGURATION	REG. PRICE	PROMO

SMILE2 Intraoral
Scanner

SMART CLOUD, EFFORTLESS ACCESS

Utilize a high-capacity cloud system for the upload and secure storage of data. This system ensures seamless integration with laboratories, facilitating the one-click transmission of scan data. Advanced partner management tools further optimize collaboration and enhance operational efficiency. Cases can be shared instantly through QR codes, providing patients with convenient access to digital models. This functionality significantly improves communication between dental professionals and their patients.

Data Hub: Simplified Management

Utilize a comprehensive data statistics system to track business performance with clear charts, ensuring you maintain control over your business's growth.

Versatile Platforms Availability Plus Offline Capability

Support for PC, web browsers, and mobile devices enhances flexibility. Support offline functionality to scan and access data anytime, anywhere.
